

## The Headset for any situation

The headset for any situation. Listen to music and sound in games with no disturbances. The integrated microphone is ideal for Voice over IP applications such as Skype™ and for communicating in online games using Teamspeak or integrated solutions. The volume controller lets you control the playback volume directly. Thanks to its wraparound design, the Headset Master 2 is especially unobtrusive and comfortable to wear. The microphone attachment is flexible. The generously sized cable has a length of nearly 8 feet. Just plug the color-coded plugs into the matching jacks on your computer, and you're done.

### Technical Details

#### HEADPHONES

- Loudspeaker dimensions: Diameter 2 x 30 mm
- Impedance: 32 Ohm +/- 10%
- Sensitivity: 105 dB +/- 10%
- Frequency range: 20 - 20 kHz
- Max. input power: 100 mW
