

Headset Master VC

Accessories

The best package for Internet telephony with video support!

The whole world
can talk for free.
Skype.com

The VoIP Set 1 is the perfect package for anyone wanting to make economical telephone calls via the Internet (Voice over IP) without sacrificing video support. Together with your favorite sound card* and messenger software*, you can talk to and see your friends anywhere in the world. Naturally, you can also use it as a cost-effective international business tool for telephone conferences with video support.

With its 640x480 pixel resolution, the TerraCam USB Pro delivers razor-sharp images via the USB port of your PC. The focus can be adjusted manually to suit the situation, and an automatic diaphragm guarantees proper brightness. Naturally, the TerraCam USB Pro is also suitable for capturing brief video clips, as well as stills with the integrated snapshot button!

The Master 1 headset is the perfect complement to the camera, with a lightweight design for maximum comfort over extended periods. The adjustable headband and flexible microphone boom ensure a perfect fit for any head shape. The optimized frequency range of the microphone and headphones guarantee optimal intelligibility at all times.
