

iQuader

Outstanding USB 2.0 stereo microphone for high-quality recording on your Mac

Designed by  **brauner. microphones**
licensed to Terratec exclusively

The iQuader—the world's first USB stereo boundary layer microphone

The perfect tool for simply making great recordings

The iQuader is the ideal solution for fast, uncomplicated recording on your Mac. High-quality technology developed by Brauner Microphones guarantees one-of-a-kind sound characteristics and exceptional quality for live recordings, podcasts, interviews or VoIP.

Developed in co-operation with Brauner Microphones, Germany

The world's first USB stereo boundary layer microphone really shows its value in its inside components. The iQuader has extremely high-quality microphone input stages and a limiter that reliably prevents digital clipping in any situation, with no impairment of the sound. It is optimally complemented with perfectly tuned, high-quality digital technology which, in addition to the standard formats, can even meet HD requirements with 24-bit resolution at a sampling frequency of 96kHz. This makes it compatible for professional applications—perfect for recordings with audio programs such as Logic, Cubase or Garage Band.

Simple operation

The operation is as simple as could be. Plug the iQuader into an available USB 2.0 input on your Mac, set the recording level, and start the recording with your preferred audio software. Genuine plug and play—no additional driver is required. Due to its acoustic operating principle, the iQuader poses no great demands when it comes to correct positioning. Brilliant recordings almost happen by themselves. This allows you to quickly and easily archive ideas and record soundscapes.

Technical Details

System requirements

- OSX 10.4.9
- USB 2.0 interface
- Audio software (e.g.. Garage Band, Logic, Cubase)

Features

- Sampling frequencies 32 kHz / 44.1 kHz / 48 kHz / 88.2 kHz / 96 kHz
- 24-bit audio technology (Core Audio support)
- Separate volume control for input signal and headphone output
- Signal-to-noise ratio: > 72 dB (A)
- High-quality electronics with finely tuned analogue level control
- Analogue limiter prevents digital clipping
- Outstanding sound characteristics
- Optimum recording of sound waves—no special orientation required
- High-quality analogue limiter
- Headphone output with volume control
- Adjustable recording level
- LED indicator for signal level
- Stand-by function
- No driver installation necessary
- Ideal for concert recordings, podcasts, interviews, soundtracks, Voice over IP

Scope of delivery

- iQuader microphone
- USB cable
- Printed manual
- Service request form and registration documents

Art No: 10551
EAN Code: 4017273105512
Warranty: 24 month
