MYSTIFY 9800 XT

AGP Graphics Card

Equipped for the future with the Mystify 9800 XT

Gaming worlds are becoming ever more complex and the borders between fantasy and reality are becoming blurred. Ever more complex optical effects and fascinatingly real 3D worlds determine the happenings on the screen. However, only if the appropriate graphics board is located in your PC. With the Mystify 9800 XT, you can have absolute realism at home.

Extreme power guaranteed

With a 730 MHz effective DDR clock speed, 256 MB RAM and the 256 bit memory interface, this high-end graphics board sets new standards in the field of 2D and 3D display. And if this is still too slow for you, you can overclock the Mystify 9800 XT easily using a driver setting — and without infringing your warranty agreement. Don't worry: The temperature and fan speed are monitored by hardware monitoring. TV out, dual monitor support and DVI bring performance to any monitor you choose.

Great bundle of games included

And so that you can get started straight away, we are enclosing "Warcraft®III", "Tom Clancy's Splinter Cell™" and "Gun Metal™" — three great games with which to try out your new graphics board. However, the game which would overtax the Mystify 9800 XT has yet to be invented: You're all set for a gaming future!

MYSTIFY YOUR GAMES

Want to squeeze every last drop of performance from your hardware? Push the possibilities of your games to the limit? Then pay attention to this label: "Mystify Your Games". Experience perfectly tuned professional equipment, specially developed for the needs of demanding players.

Technical data

- **Quad-Pipe Pixel Power**, Graphics environment with four independent rendering pipelines
- **High Performance 3D**, established graphics solution, which supports Microsoft® DirectX® 9.0 with AGP 4/8X
- **SMOOTHVISION™**, sharp and ultraclear textures without impinging on the image rate
- **FULLSTREAM™**, obtain a smoother and improved quality streaming content from the Internet
- **Monitor management using HYDRAVISION™**, giving control over the monitor display

Memory interface

- 256 MB DDR (256 bit) @ 730 MHz

Connections

- TV output
- DVI output
- VGA output

Miscellaneous

- CATALYST driver

System Requirements

- 300 watts power supply or higher recommended
- Intel Pentium 4, AMD Athlon or higher with AGP 8X (0.8v), 4X (1.5v) or Universal AGP 3.0 bus configuration (8X/4X)
- 128 MB system memory
- Installation requires CD ROM drive

Art.No.: 074000
EAN-Code: 4017273674001
Warranty: 24 months
