The ultimate WLAN and Ethernet audio player!

The audio player for networks

NOXON 2 audio is the all-flexible audio player for home, office and your backyard. Wherever you can access your wireless network or Ethernet network, you can listen to an unlimited variety of Internet radio stations from countries all around the world or access your entire MP3 archive from your computer. Operating this portable, modern, and cool-designed jukebox using remote control or its built-in keyboard is obvious and easy, and the high-contrast display gives you absolute control over your music playback.

Connect your portable MP3 player or portable drive

An additional USB 2.0 port adds the finishing touch for complete music diversity: Use it to connect your portable MP3 player, memory sticks or a portable USB 2.0 hard drive containing your personal play lists and listen to the songs immediately. The NOXON 2 audio plays MP3 and WMA9 audio formats at up to 320kbps using the UPnP software provided. Support for Digital Rights Management guarantees that you can play songs bought online that have Windows Media DRM10 copy protection.

Data security with encryption

The NOXON 2 audio is designed for 54 Mbit networks (802.11g) and can also be operated on 11 Mbit networks (802.11b), the external antenna ensures good signal quality. WEP and WPA encryption support provides secure data transfer from the sender to the receiver. And if your NOXON 2 audio ever finds itself outside the range of an available wireless network (like in a basement), you can continue to use it simply by plugging it into your Ethernet cable-connected home network—no setup necessary.

Tons of playback options

How do you like your music best? Through active speakers? A separate headphone jack? Your digital home entertainment system through an S/P-DIF jack? The NOXON 2 audio does it all, and the choice is yours.

* For it to work with the NOXON 2 audio, your MP3 player or external drive has to support the USB2.0 mobile storage protocol.

Technical Details

Standards
- IEEE 802.11b
- IEEE 802.11g
- IEEE 802.3, IEEE-802.3u
- UPnP
- Microsoft Windows Media DRM10
- USB 2.0 mobile storage support

Data Rates
- 54 Mbit/s (WLAN)
- 10/100 Mbit/s (Ethernet)

Network Security
- WEP encryption (64/128 bit key support)
- WPA encryption

Connectivity
- Wireless Access Point
- Ad-hoc (Peer to Peer)

File Formats
- Internet radio (streaming MP3, MMS)
- MP3 (up to 320 kBit/s, CBR/VBR)
- ID3 V1.0 / V2.0
- M3U
- PLS
- WMA-9 (up to 320 kBit/s) unprotected and Windows Media DRM10 protected

Connectors
- Line out (RCA)
- Headphone out (3.5mm Jack - plug)
- S/P-DIF digital out (TOS-Link)
- Ethernet RJ-45
- USB 2.0 (Type A)
- Power

Features
- Infrared remote control
- USB 2.0 host
- Windows Media DRM10 support
- Firmware upgrades via WLAN/Ethernet
- Crystal clear LCD screen
- Digital Out

Power Adapter
- 9V / 1A

System requirements PC
- 802.11b or 802.11g wireless network adapter or 802.11g WLAN access point (recommended)
- WPA encryption activated (recommended)
- Windows 2000 or XP
- Minimum Pentium III 500 MHz processor
- 64 MB RAM memory
- UPnP server application e.g. Twonkyvision MusicServer (recommended)
- Microsoft Windows Media Connect for DRM10 protected content
- DSL internet service (required for internet radio)

System requirenments Mac
- Macintosh computer with a PowerPC® G4 or G5 processor
- Mac OS X 10.3
- Minimum 20 MB free hard disk space
- iTunes installed for viewing music content

Software
- TwonkyMusic (PC)
- elgato EyeConnect (MAC)
- Update- and Configurationtool

Package Contents
- NOXON 2 audio wireless audio adapter
- Power adapter
- Remote control (with batteries)
- Software CD-ROM
- Manual
- Registration card
- Service card

Art.No.: 10198 (EU version)
EAN code: 4017273101989 (EU version)
Warranty: 24 months
