

CINERGY T PCIe DUAL HD

PCI Express Dual DVB-T (Freeview) and DVB-C tuner

- PCIe Dual DVB-T and DVB-C Tuner
- Record one program while watching another (Dual Tuner)
- Picture in Picture
- Digital videorecorder
- Remote control and antenna
- Direct recording and programming via EPG
- Teletext, Time shifting TV programs

The Cinergy T PCIe Dual is the modern solution for digital terrestrial TV (DVB-T, Freeview and DVB-C) on your computer. Plugged into a PCI Express slot the two tuners on the board allow you to record one program while watching another. The Cinergy T PCIe Dual receives digital terrestrial television via an outdoor or indoor antenna. No worries: Because the signal is distributed to both tuners internally, only a single cable connection is required. Besides that the Cinergy T PCIe can be connected with a digital cable connection in your house to receive the digital cable channels (DVB-C) you subscribed to. And thanks to the remote control included in the package, you won't have to get off your couch.

The TV-software provided turns television on the computer into an experience. You can easily record the program that is in progress to your computer's hard drive, and can later burn all episodes of your favourite series to a DVD. Time shifting is very useful indeed. If your Sunday mystery has already begun and the pizza delivery man rings the doorbell, simply pause the program that is in progress at the touch of a button – and, after the interruption, pick up right where you left off! The built-in electronic program guide (EPG) and the familiar teletext make personal TV planning easier than ever.

CINERGY T PCIe DUAL HD

PCI Express Dual DVB-T (Freeview) and DVB-C tuner

Features

- Digital TV (DVB-T, Freeview) and DVB-C on your PC
- Two tuners for simultaneous reception of two independent stations
