

CINERGY CI USB

Pay TV extension for Cinergy TV cards

- CI connection via USB for all digital Cinergy products
- Power supply via USB 2.0
- HD support for MPEG2 and H.264
- AC3 Dolby Digital codec included

Incl. TerraTec Home Cinema software:

TerraTec Home Cinema turns television on the computer into an experience. Whether internal or external TV card, whether digital (DVB-T, DVB-S, DVB-C) or analogue (antenna, cable) – the possibilities of turning your computer into a television are endless. Use a PCI card and a USB box, for example, to record a program and simultaneously view another one or record several broadcasts. All TerraTec TV cards can be freely combined for this purpose.

In addition to the usual functions, such as time-shifted television, electronic program guide (EPG) and digital video recorder, the TerraTec Home Cinema offers a few innovations: With remote programming via the Internet, the current television program can be conveniently searched and a recording can be programmed with a click of the mouse. For this purpose, TerraTec Home Cinema accesses the established service of tvtv.de – an annual subscription is included in the purchase price (download: 60-day version). The computer wakes up at home from standby or the idle state on time and the desired broadcast automatically lands on the hard disk.

Even easier are recordings using the electronic program guide during the broadcast – simply press the corresponding button on the remote control. No matter how you plan your recordings: They can already be viewed while the recording is still running!

More new functions of the TerraTec Home Cinemas include: Automatic optimization of the aspect ratio, recording of Dolby Digital (AC3), video text and subtitles, support of DVB radio and customizable lists of favorites (genre, location), multi-tuner support and constantly available help functions as well as the advertising editor Cut! which allows for easily cutting advertising blocks – easier than ever before.

Slim and resource-saving, intuitive operation, yet very extensive – the TerraTec Home Cinema fully exploits the possibilities of television on the computer!

Technical Details

Features

- CI connection via USB for all digital Cinergy products
- Plug'n'Play
- Video Codecs: MPEG 2, MPEG 4 / H.264 for HD
- Audio Codecs: AC3 Dolby Digital, MPEG Audio
- EPG, Teletext and TimeShifting
- Picture in Picture within a transponder
- Remote control
- Digital video recorder

CAM supported

- AlphaCrypt, Conax, Irdeto, Mediaguard, Viaccess

Software

- TerraTec Home Cinema

System requirements

- digital TerraTec Cinergy TV card
- for further supported tv solutions visit www.elgato.com and www.sceneo.com
- 2,0 GHz Intel or AMD CPU
- 1024 MB RAM
- Windows XP SP2 / Vista
- Mac OS with Elgato eyetv
- USB 2.0 Interface
- 300 MB free hard drive space for software installation
- Direct-X-compatible audio hardware
- Direct-X-compatible video card with video overlay function
- CD/DVD drive for driver/software installation

System recommendation for HDTV reception

- Dual Core Intel or AMD CPU for HDTV decoding
- 1024 MB RAM (Win XP) 2048 MB RAM (Win Vista)
- Graphics card with hardware acceleration for HDTV

Scope of delivery

- TerraTec Cinergy CI USB
- USB cabel
- Installation & software CD
- Service request form
- Registration documents
