

CINERGY HT PCI

Analogue & Digital TV Tuner

- DTT (Freeview) and analogue TV reception (cable, antenna)
- Digital video recorder with editing functions
- FM radio tuner
- Analogue video and audio inputs
- Incl. remote control

Incl. TerraTec Home Cinema software:

TerraTec Home Cinema turns television on the computer into an experience. Whether internal or external TV card, whether digital (DVB-T, DVB-S, DVB-C) or analogue (antenna, cable) – the possibilities of turning your computer into a television are endless. Use a PCI card and a USB box, for example, to record a program and simultaneously view another one or record several broadcasts. All TerraTec TV cards can be freely combined for this purpose.

In addition to the usual functions, such as time-shifted television, electronic program guide (EPG) and digital video recorder, the TerraTec Home Cinema offers a few innovations: With remote programming via the Internet, the current television program can be conveniently searched and a recording can be programmed with a click of the mouse. For this purpose, TerraTec Home Cinema accesses the established service of tv.de – an annual subscription is included in the purchase price (download: 60-day version). The computer wakes up at home from standby or the idle state on time and the desired broadcast automatically lands on the hard disk.

Even easier are recordings using the electronic program guide during the broadcast – simply press the corresponding button on the remote control. No matter how you plan your recordings: They can already be viewed while the recording is still running!

More new functions of the TerraTec Home Cinemas include: Automatic optimization of the aspect ratio, recording of Dolby Digital (AC3), video text and subtitles, support of DVB radio and customizable lists of favorites (genre, location), multi-tuner support and constantly available help functions as well as the advertising editor Cut! which allows for easily cutting advertising blocks – easier than ever before.

Slim and resource-saving, intuitive operation, yet very extensive – the TerraTec Home Cinema fully exploits the possibilities of television on the computer!

Technical Details

Features

- Digital or analogue TV on your PC
- Digital video recorder
- Timeshifting
- EPG support
- Teletext
- Remote control

Connectors

- Antenna
- Composite-Video and S-Video
- Audio

Software

- Terratec Home Cinema
- Ulead MovieFactory 3 TV

System Requirements:

- 2.0 GHz Intel or AMD CPU or comparable Centrino-certified laptop
- 512 MB RAM
- Operating system: Win XP SP2
- PCI interface
- 300 MB free hard drive space for software installation
- Direct-X-compatible audio hardware
- Direct-X-compatible video card with video overlay function
- CD/DVD drive for driver/software installation
- CD/DVD drive for creating CDs/DVDs
- Analogue antenna or cable reception
- Digital terrestrial reception (DVB-T)
- One free PCI 2.1 slot

Scope of delivery:

- TerraTec Cinergy HT PCI
- Remote control
- Infrared receiver
- Installation & software CD
- Manual (CD)
- Service request form
- Registration documents

Important notes on Digital Terrestrial TV reception in the UK:

Please ensure you can receive the Digital Terrestrial Television (DTT) service in your region. Check here for coverage: <http://www.dtg.org.uk/retailer/coverage.html>

The TerraTec CINERGY Digital TV products require that you use a high-gain roof antenna to enable and enjoy reliable Digital Television reception throughout the UK. The portable antenna that we provide should only be used and relied on in areas where the Digital TV signal reception is optimal. (Some countries or regions can have different reception conditions, and the environment in which you are viewing can be affected by various factors: Proximity to the Digital TV transmitter, heavy/ tall building constructions and thick walls or ceilings.)

Portable or mobile Digital TV reception in cars, trains or airplanes etc. is normally not supported.

The UK Digital Terrestrial TV coverage is changing and improving all the time as new digital transmitters are erected. For more general information on the switchover from analogue to Digital Terrestrial Television coverage in your region, please check here: <http://www.digitaluk.co.uk/site/index.html>
