

# CINERGY T USB XXS HD

**Ultra compact DVB-T tuner -  
future-proof with HDTV support**

- State-of-the-art USB DVB-T tuner (DTT, Freeview)
- Codec set for HDTV support
- USB 2.0 compatible
- Remote control
- Aerial with magnetic base and sucker
- USB cable

**Incl. TerraTec Home Cinema software:**

TerraTec Home Cinema turns television on the computer into an experience. Whether internal or external TV card, whether digital (DVB-T, DVB-S, DVB-C) or analogue (antenna, cable) – the possibilities of turning your computer into a television are endless. Use a PCI card and a USB box, for example, to record a program and simultaneously view another one or record several broadcasts. All TerraTec TV cards can be freely combined for this purpose.

In addition to the usual functions, such as time-shifted television, electronic program guide (EPG) and digital video recorder, the TerraTec Home Cinema offers a few innovations: With remote programming via the Internet, the current television program can be conveniently searched and a recording can be programmed with a click of the mouse. For this purpose, TerraTec Home Cinema accesses the established service of [tvv.de](http://tvv.de) – a 60-day trial version is included. The computer wakes up at home from standby or the idle state on time and the desired broadcast automatically lands on the hard disk.

Even easier are recordings using the electronic program guide during the broadcast – simply press the corresponding button. No matter how you plan your recordings: They can already be viewed while the recording is still running!

More new functions of the TerraTec Home Cinemas include: Automatic optimization of the aspect ratio, recording of Dolby Digital (AC3), video text and subtitles, support of DVB radio and customizable lists of favorites (genre, location), multi-tuner support and constantly available help functions as well as the advertising editor Cut! which allows for easily cutting advertising blocks – easier than ever before.

Slim and resource-saving, intuitive operation, yet very extensive – the TerraTec Home Cinema fully exploits the possibilities of television on the computer!

# CINERGY T USB XXS HD

## Technical Details

### Features

- DVB-T (Freeview, DTT) receiver with remote control
- Latest tuner technology for optimal reception
- Codec set for HDTV
- Digital video recorder
- Picture in Picture within a transponder
- EPG, Teletext and TimeShifting
- USB 2.0 compatible
- USB bus powered

### System requirements

- 2,0 GHz Intel or AMD CPU
- 1024 MB RAM
- Windows XP SP2 / Vista
- One free USB 2.0 port
- 300 MB free hard drive space for software installation
- Direct-X-compatible audio hardware
- Direct-X-compatible video card with video overlay function
- CD/DVD drive for driver/software installation
- Terrestrial digital TV reception (DVB-T, Freeview, TNT)

### System recommendation for HDTV reception

- Dual Core Intel or AMD CPU for HDTV decoding
- 1024 MB RAM (Win XP) 2048 MB RAM (Win Vista)
- Graphics card with hardware acceleration for HDTV
- Terrestrial digital TV reception (DVB-T, Freeview, TNT) with HD resolution

### Software

- TerraTec Home Cinema
- Codec set for HDTV

### Scope of delivery

- Cinergy T USB XXS
- Aerial with magnetic base and sucker
- Aerial adapter MCX to IEC
- Remote control
- USB cable
- CD Cinergy THC HD Update
- Installation & software CD
- Quick Setup Guide
- Service request form
- Registration documents
