

TV ON YOUR COMPUTER

USB universal receiver for digital and analogue TV & radio

H5

TerraTec H5

- USB stick for DVB-T, DVB-C, analogue TV & radio
- Analogue inputs for digitalisation of VHS cassettes
- Supports HDTV and Dolby Digital*
- Software for Windows PC and Mac
- Connection via USB 2.0
- Including remote control and DVB-T antenna

TerraTec H5 is a compact and universal TV stick with three receivers for DVB-T, DVB-C, analogue TV and FM radio. Simply plug it into a free USB 2.0 port, and the handy stick transforms netbook, laptop and desktop computers into a full-function television with full HDTV support (including Dolby Digital)* and many additional features. Software for Windows and Mac computers allows operation on all household computers, extensive accessories with a remote control and DVB-T antenna are included in the shipping package. Additionally, digitalisation of VHS cassettes is easy via the analogue inputs.

* For a Mac it is necessary to pay for an update to the EyeTV full version
