

## SubSession HomeArena 5.1 – Cinema Experience at Home

Sit back and immerse yourself in the atmospheric worlds of sound of the very latest games and DVD productions. TerraTecs' SubSession HomeArena 5.1 puts you right in the centre, not just in front!

This matching 5.1 set comprises two front and two rear loudspeakers, a centre speaker and a powerful 8" subwoofer for that authentic home cinema experience. The compact wooden housings of the full-range satellites are also suitable for mounting on stands or wall mounting and blend into any room thanks to their attractive design. The swift and simple adjustment of all the volume settings is performed entirely using a slim, wireless infrared remote control that features a mute switch.

The generously proportioned amplifier output with 55 watt RMS produces ideal conditions for experiencing that captivating and perfect sound from DVD movies or games and applications with Dolby Surround, DTS, EAX or DirectSound 3D output. Featuring six discreet audio inputs, the system is also an ideal complement for the latest 5.1 soundcards from TerraTec! TerraTec SubSession HomeArena 5.1 – the complete surround sound system for spoilt audience.
