

Requiring so little space and at an unbelievably low price, the HomeArena Stereo can provide a balanced sound level for games and music – at home or in the office. The loudspeaker system is extremely easy to install and connect. Take advantage of its good sound and simplicity of use.

The two-way system integrated in the speakers of the HomeArena Stereo provide a clear and transparent sound. The low and middle frequency ranges are provided by two 7.5 cm (3") chassis. There is also an additional tweeter for brilliance in the upper frequencies.

With its 3 W RMS (60 W P.M.P.O.) per channel and a frequency response of between 60 Hz and 30 kHz, the HomeArena Stereo is the perfect all-round sound solution. A particular feature is the integrated cable remote control, allowing you always to keep the total system volume fully under control.

#### Technical Details

- Output: 2 x 3 W RMS (2 x 60 W P.M.P.O.)
- Dimensions: 225 x 140 x 105 mm
- Contents: 2 speakers, wire remote control, mains adaptor, short reference
- Connectors: Line-In: 3,5 mm jack, satellites: RCA
